

User Guide for Legal Agent Application

Introduction

Welcome to the Legal Agent Application, an advanced tool designed to streamline legal tasks and communication. This application leverages AI capabilities to assist with email drafting, document management, and legal inquiries. Its purpose is to enhance efficiency and accuracy in handling legal documentation and correspondence.

Conversation Management

Understanding Threads

In our application, a "thread" represents the ongoing history of your conversation with the agent. Maintaining the same thread allows the agent to remember the context and details of previous interactions, leading to more relevant and coherent responses. To keep the same thread active, continue using it for related discussions.

If you wish to start a new conversation, click the "End Chat" button. This action will close the current thread and begin a new one.

Session and Browser Storage

Threads are stored in your web browser's history. This means that if you close or refresh the browser, your conversation history will be cleared, and a new thread will start. This temporary storage design ensures that your interactions are not retained between sessions. If the application is idle for a long period or refreshed, a new thread will automatically be created.

To begin a new conversation, click the "Start Chat" button. To end and delete an existing thread, use the "End Chat" button.

Handling Responses and Application Stability

While the agent is processing a response, wait until it finishes before sending additional questions. Adding new prompts during this time may result in lost responses. If the application crashes or freezes, refresh the page, end the chat, and start a new conversation to restore functionality.

Document Management

Interacting with Documents

Our application allows you to upload and interact with your documents using our custom vector database. To upload documents:

1. Click the "Browse" button.
2. Select the files you want to upload.
3. Click the "Upload" button.

Once you see a success message at the bottom, your document is ready for interaction. This feature is valuable for querying and analyzing your documents efficiently.

Functions

Send Email

1. **Description:** Assists with drafting and sending emails.
 - **Process:**
 - Draft the email body and subject.
 - Confirm recipient email addresses.
 - Ask the user to add any file attachments and inform them that attachments can be viewed on the side panel.
 - **Example Interaction:**
 - **User:** I need to send a summary to John.
 - **Agent:** Please provide the context for the email and confirm John's email address.
 - **User:** Confirmed, please send the email.
 - **Agent:** Please verify that the correct attachments are uploaded if applicable.

Export Documents for Copying

1. **Description:** Exports the text written in the sidebar so that it can be copied by users.
 - **Process:**
 - Confirm the text or content to be copied.
 - Execute the export function.
 - **Example Interaction:**
 - **User:** I want to export the text for copying.
 - **Agent:** Please confirm the text you want to copy.
 - **User:** Confirmed, please export this.
 - **Agent:** Please click on the copy button in the sidebar to access your text.

Agent Use Cases

The agent is designed to handle a variety of tasks effectively. Below are examples of how the agent can be used:

1. Summarize Case Laws

○ Example Prompts:

- "Summarize the latest case law on intellectual property."
- "What are the main points of the recent contract dispute case?"
- "Provide an overview of the recent employment law ruling."

2. Respond to Case Law Queries

○ Example Prompts:

- "What was the decision in Smith vs. Jones?"
- "Explain the significance of the case law on torts."
- "What precedents were set in the recent environmental law case?"

3. Provide Insights from Case Laws

○ Example Prompts:

- "Discuss the implications of the latest property rights ruling."
- "How does the recent case affect contract law?"
- "What is the impact of the latest legal precedent on corporate law?"

4. Search and Reference Law Acts

○ Example Prompts:

- "Find sections related to liability in the Companies Act."
- "Search for the latest amendments in the Data Protection Act."
- "Provide a reference for the provisions on employment contracts."

5. Draft Agreements or Contracts

○ Example Prompts:

- "Draft a partnership agreement with these terms."
- "Create a lease agreement for commercial property."
- "Generate a freelance services contract based on this template."

6. Edit and Update Drafts

○ Example Prompts:

- "Edit the confidentiality agreement to include a non-compete clause."
- "Update the contract draft with these changes."
- "Revise the draft based on these comments."
